

# Planning Commission Charrette

## Warren Main Street — Improvement Project

The purpose of this planning charrette is to have interested residents of the Town of Warren offer their design ideas and suggestions for improvements to be made in the village center of Warren in that section of Main Street between Brook Road and the bridge south of the Warren Store. Though the project is limited to the aforementioned section of Main Street, it is important to keep in mind the relationship with Warren Village as a whole.

Specifically the project has three goals: 1) To provide orientation, safety, accessibility and comfort to walkers, bicyclists, and other multi-modal users in the Village; 2) To develop pedestrian improvements that will promote and encourage usage and ultimately reduce overall traffic speed in the area; and 3) To develop landscape and gateway enhancements that complement and improve the aesthetic quality, slow traffic and provide a sense of welcome to the village.
