

ARTICLE 10. DEFINITIONS

Draft: January 28, 2010

Section 10.2 Definitions

The following definitions will be revised in or added to Article 10:

Telecommunications Facility: A support structure which is primarily for communication or broadcast purposes and which will extend vertically 20 feet, or more, in order to transmit or receive communication signals for commercial, industrial, municipal, county, state or other governmental purposes, and associated ancillary facilities that provide access and/or house equipment (see Section 4.18 (A) & (B)).

Telecommunications Antenna. Any structure designed for transmitting signals to a receiver or receiving station or for receiving television, radio, data, communication, or other signals from other antennas, satellites, or other services.

Telecommunications Antenna, Wireless. A structure that transmits and/or receives electromagnetic signals for the purpose of transmitting personal wireless services as defined in the federal Telecommunications Act of 1996 and as subsequently amended, along with related equipment and base structures. This definition specifically excludes towers or other structures built primarily to support antennas.

Tower. Any ground-mounted pole, spire, structure, or combination thereof, including supporting lines, cables, wires, braces, masts, intended primarily for the purpose of mounting a telecommunications antenna above ground.
